

# TIPS

## Change Frontier WiFi Network Name and Password

- This guide applies to Greenwave G1100 FiOS router.
- Use Smart phone or any desktop has internet connection, open a web browser and go to <http://192.168.1.1>.
- Enter the [Admin Password](#) (located on the sticker on the side of router) and click [Next](#).
- Click [Change Wireless Settings](#) from the lower left-hand side.
- Enter names that are easy to remember in the SSID fields (your FiOS router has two different wireless networks (2GHz and 5GHz) that need two different names).
- Enter passwords for each network. They can be the same or different from one another.
- Click [Apply](#).
